

# TRY THEN BUY

If you are interested in testing or comparing some of KOBİ Electric's LED products in a lighting retrofit, renovation or want to demo for a customer, KOBİ Electric's "TRY THEN BUY" program will allow you to install or demo the product(s) 'in person' at your facility or the customer's site at no risk.

The 'TRY THEN BUY' program allows you to test or demo up to six qualifying products for your test application. Just select your products and mark your order "TRY THEN BUY". Your order will receive 60-day dating terms to allow you time to install the products and see the results!

If you decide to keep the products, simply pay the invoice when it is due. If you elect to return the products, you need only to request an RGA within the 60-day period and then return the products to us in original cartons at your expense. Once we receive the returned product and confirm it is in good condition, we will immediately issue a credit memo to offset the cost of the original invoice.

To get started contact your local KOBİ Electric Lighting representative or call KOBİ Electric at: 800-505-2106.
